Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number

At least one error upon which reissue is based is described as follows:

I believe the original of aforesaid patent to be wholly or partly inoperative by reason of my claiming more or less than I had a right to claim in the original patent, due to errors in each of claims 1 through 10, and more specifically, by failing to more broadly claim my inventions as disclosed and described in the original patent. Specifically, although the specification broadly describes power management control for monitors, independent claim 1 describes my invention too narrowly by claiming "a power supply unit for converting an AC input voltage to a DC output voltage", although my invention may be practiced "to reduce the power consumption of a color display tube", as described in column 2 at lines 57 and 58. Accordingly, it is my intent and desire to obtain broader coverage of my inventions as defined by newly presented claims 11 through 60 in this reissue application, and it is my intent and desire to obtain clarified coverage of my inventions as set forth in the amended claims 7 through 10 in this reissue application.
